PROFILE SUMMARY

B.Tech student in Artificial Intelligence & Data Science at KL University with a strong academic record (CGPA: 9.3/10) and hands-on experience in Python, Machine Learning technologies, and Tableau. Developed multiple full-stack and data-driven applications through internships and independent projects, demonstrating strong analytical, problem-solving, and software development skills. Passionate about transforming data into actionable insights and building scalable, intelligent technology solutions. Seeking opportunities to apply technical expertise, collaborate on innovative projects, and grow as a software engineer.

EDUCATION

Bachelor of Technology — Artificial Intelligence & Data Science

Jul 2024 – May 2028

KL University, Andhra Pradesh | CGPA: 9.3 / 10

Intermediate (Class XII)

Jun 2022 – May 2024

Tirumala Junior College | Percentage: 88.4%

EXPERIENCE

Data Analytics Intern | RamTech Solutions LLC

Dec 2025 – Feb 2026

- Built an interactive Healthcare Analytics Dashboard in Tableau visualizing treatment costs, hospital ratings, and average procedure cost trends across real hospital datasets.
- Transformed raw healthcare CSVs into structured visual reports; identified key cost patterns across 3+ metrics to support data-driven stakeholder decisions.
- Automated data cleaning and preprocessing workflows in Python, ensuring consistent reporting accuracy and reducing manual effort.

PROJECTS

Online Medical Virtual Consultation Platform | Personal Project

Dec 2025 – Jan 2026

- Engineered a full-stack healthcare platform supporting virtual patient-doctor consultations, digital prescriptions, and appointment management.
- Implemented role-based access control (RBAC) for 4 roles — Doctor, Patient, Pharmacist, Admin — ensuring secure, scoped data access across all modules.

Career Assessment Tool | Personal Project

Aug 2025 – Dec 2025

- Developed a React.js web app that maps user-input interests and skills to curated career paths using a rule-based recommendation engine.
- Designed an accessible, interactive UI with personalized output panels, improving decision-making for students and early-career job seekers.

Data Analytics Dashboard for Business Insights | Personal Project

Jan 2026 – Feb 2026

- Built a Python-based analytics dashboard using Matplotlib and Seaborn with a full EDA pipeline — ingestion, cleaning, and visual reporting.

Interactive Data Analytics Dashboard | Personal Project

Jan 2025 – May 2025

- Created a multi-view Tableau dashboard with dynamic filters and charts enabling exploratory trend analysis for non-technical stakeholders.

TECHNICAL SKILLS

Languages	Python 3, Java, JavaScript, SQL
Web & Frameworks	React.js, Node.js, HTML5, CSS3, Spring Boot
Data & ML	Tableau, Pandas, NumPy, EDA, Data Visualization, Matplotlib, Seaborn
Tools & Platforms	Git, GitHub, PyCharm, VS Code, Eclipse, Render, IDLE
Concepts	Full-Stack Development, REST APIs, RBAC, OOP, Agile

CERTIFICATIONS

- AI for Beginners — HP (Jun 2025)
- Data Analytics Job Simulation — Deloitte (Oct 2025)
- React.js — Infosys (Nov 2025)
- Linux Essentials — Cisco (Oct 2025) | Operating Systems Basics — Cisco (Sep 2025)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Stage & Protocol Coordinator — Samyak Techno-Management Fest, KL University; managed guest coordination, event scheduling, and real-time stage execution for 1,000+ attendees.
- Led planning and volunteer coordination for both technical and non-technical events at Samyak Fest — end-to-end event execution across multiple tracks.
- Completed social internship in agricultural field support; conducted farmer interactions and studied sustainable farming practices to understand community needs.
- Active member of KL University Gaming Club — participated in e-sports competitions and interactive technology events.
- Competitive programmer on CodeChef, actively sharpening algorithmic problem-solving and data structures skills.
